SPERRING
SOFTWARE CONSULTING
IDEAS. EXPERTISE. REAL SOLUTIONS.

TECHNOLOGY LEADERSHIP WITH JAMES SPERRING

Experienced technology leadership. A few days a month.

For founders of B2B businesses with small teams or software partners.

I work with founders to decide what to build and help their developers move it forward. We agree time to work together regularly, with room to get to know your business.

Ways to work together

Ongoing technology leadership

Experienced support, a few days a month. Work with me regularly to decide what to build and help your team move it forward. I get to know your business and stay involved as things change.

Monthly fee agreed with you · Typically 2–3 days a month

Tech Value & Risk Scan

An independent CTO review over 10 working days. A review of decisions spanning product, engineering, platform and leadership. Leave with clear options, prioritised risks and a practical 90-day plan.

From £9,500 + VAT · 10 working days

Delivery Constraint Audit

A focused review of software delivery. A narrower review for slow releases, slipping roadmaps and unclear ownership. Understand the constraints and give your team a practical plan to improve flow.

From £7,500 + VAT · 2–3 weeks

Experienced advice, focused on your business.

We agree the time, responsibilities and fee before starting. You can come straight to ongoing support or ask for a standalone review. I'm based in Gosport, near Portsmouth in Hampshire. I work remotely across the UK, with face-to-face time where the project calls for it.

Recruitment and development referrals may involve fees; these connections do not determine the advice given. Read about independent advice and referrals.

Let's talk about your next step.
